Response to Amendment

1. The addition of the limitation "wherein said second member having excellent conductivity has a structure in which a projecting portion for connecting a control circuit substrate is provided on one short side of a plate portion having an oblong card shape that is larger than said first member in outer shape thereof, said first member being joined with said plate portion of said second member, a combined thickness of said first member joined with said second member being approximately uniform" changes the scope of independent claim 1. Therefore, the amendment raises new issues that would require further search and consideration.
